

LARISA ELENA BUCOS

*Data Technician with a
specialization in Programming*

PROFILE

My aspiration is to become a skilled programmer, and I am well on my way. I am currently in Hovedforløb 2 as a Data Technician specializing in Programming and looking for an apprenticeship where I can grow as a backend (and later fullstack) developer.

Outside of school, I enjoy exploring topics like psychology, massage, bonsai, and terrarium plants, and I express my creativity through painting and growing rare plants. These interests reflect my curiosity, calm focus, and readiness to take on new challenges.
